\* Scotia Capital Universe Bond Index -- Compiled by Scotia Capital, the index is a broad measure of total return for the Canadian bond market, covering 700 marketable Canadian bonds with a maturity greater than one year.

The performance data shown reflects changes in unit values and assumes that all income/realized net gains are retained by the Fund in the periods shown and are reflected in higher unit values of the Fund. It does not take into account sales, redemption, distribution or other optional charges or income taxes payable that would have reduced returns.

**Past results are not indicative of future performance of the Fund.**

The Financial Highlights tables (left) show selected key financial information about the FORTRESS Funds and are intended to help you understand the Fund's financial performance for the past 5 years. This information is derived from the Fund's audited financial statements.

<sup>(1)</sup> As at December 31st of the year shown.

<sup>(2)</sup> The Management expense ratio is based on total expenses for the year shown, including the expenses of the underlying fund, expressed as an annualized percent of daily average net assets during the year, and includes GST.

<sup>(3)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
