⁽²⁾ The Management expense ratio is based on total expenses for the year shown, including the expenses of the underlying fund, expressed as an annualized percent of daily average net assets during the year, and includes GST.

⁽³⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
